

Professional Experience

IT Consultant / Freelance

January 2025 – Present

- Managed the full software development life cycle for various clients, from functional requirements gathering to deployment, delivering optimized web solutions for small and medium enterprise growth.
- Executed the redesign and SEO optimization for the "Pablo Marte" artist platform, achieving visual improvements and superior organic ranking in Google search results.
- Provided technical consultancy to local businesses, evaluating software feasibility and proposing technology stacks to optimize operational and sales processes.

Tech Stack: *Nextjs, React, Typescript, Tailwind, HeroUI, Firebase, Git.*

Full-Stack React Web Developer, Excite - Inbound Marketing México

April 2024 - December 2024

- Implemented and documented Stripe payment gateway integration for a SaaS platform, creating technical guides for future system scalability.
- Collaborated directly with the UX/UI team, translating Figma designs into reusable modular components that reduced development time for new projects by 30%.
- Developed a content automation system by integrating web scraping libraries for Google Trends and automating news publication across CMS platforms without human intervention.

Tech Stack: *Nextjs 14, React 18.3.1, Javascript, MUI 5.15.19, Tailwind 3.4.X/4.0, Stripe, Firebase, Google Cloud, Docker, MongoDB, Git.*

Full-Stack Java Web Developer, Secretaría de Seguridad del Estado de México

February 2023 - April 2024

- Optimized server performance and stability through corrective maintenance and technical configuration adjustments, ensuring hosted systems could handle high workloads and maintain service continuity.
- Proposed and implemented a Linux server with GitLab to improve team organization and workflow; also deployed an independent staging environment to mitigate production risks.
- Participated in the analysis, requirements gathering, development, maintenance, testing, and production deployment of assigned web systems.
- Authored technical documentation, flowcharts, process mapping, and entity-relationship diagrams) for assigned systems.

Tech Stack: *JavaEE 7, JSF 2.2, Primefaces 5.2, Bootstrap 3.3.6/5.X, JQuery, Java 8, Javascript, MySQL, Git.*

**Front-End React Web Developer,
DADUVA SYSTEMS**

March 2022 - February 2023

- Proposed and established a collaborative workflow using GitHub, enabling rigorous delivery tracking and version control.
- Performed maintenance, design, and development for various administrative systems and websites, prioritizing load times, SEO management, and responsive design for ad campaign sites.
- Developed a real-time chat prototype based on the WhatsApp Web UI, incorporating a fully responsive design.

Tech Stack: *Nextjs 12, NextUI 1.0.0, React 18.2.0, Javascript, MUI 4.12.4/5.0.6, Tailwind 3.1.4, Git.*

**Full-Stack Web Developer Jr.,
Satori Tech**

September 2021 - March 2022

- Led teams of up to 5 members in web system development, establishing workflows based on Agile methodologies and Scrum boards, resulting in more predictable project delivery and measurable productivity gains.
- Facilitated the onboarding of new developers through technical training and personalized mentorship, significantly reducing their learning curve and aligning them with company quality standards.
- Participated in the continuous maintenance and development of 12 web projects, including landing pages, PWAs, admin panels, inventory systems, SaaS, and CMS.

Tech Stack: *React 16.14.0, Vue.js 2.6.14, Vuetify 2.6.0, Laravel-Blade 5.5/6.X/7.X/8.X, Javascript, Bootstrap 3.X/4.X/5.X, JQuery, PHP 7, MySQL, Docker, Git, Adobe.*

**Internship,
Satori Tech**

March 2021 - August 2021

- Contributed to the full life cycle of 7 web projects, including landing pages, admin panels, and a social network. Contributions spanned from database modeling and RESTful API design to front-end development.
- Designed and developed an internal administrative system prototype for project management, focused on tracking the company's applications in development.
- Standardized login creation for company web projects by developing a reusable authentication module including email validation and password recovery.

Tech Stack: *Vue.js 2.6.14, Vuetify 2.6.0, Laravel-Blade 5.5/6.X/7.X/8.X, Javascript, Bootstrap 3.X/4.X/5.X, JQuery, PHP 7, MySQL, Docker, Git, Adobe.*

Education & Languages

**Bachelor's Degree in Computer Systems Engineering,
Instituto Tecnológico de Toluca
August 2015 – June 2021**

**TOEFL ITP Certification – CEFR Level B1,
Instituto Tecnológico de Toluca
May 2023**
